George Hall, DMD

Prosthodontics, Private Practice – Augusta, Georgia

Treatment Planning Consideration in Prosthodontics: From the ABC's to Poetry

Aspects of Removable and Fixed Prosthodontics with Implant Dentistry are discussed. Proper treatment planning of these restorations is key. In addition, the different steps and methods in the fabrication of an implant supported fixed and removable prosthesis is considered. A range of simple to complex topics is covered from terminology to hybrids. Successful and unsuccessful case presentations are reviewed including treatment planning failures.

Objectives covered:

- 1) Proper implant terminology*
- 2) Removable prosthodontics indications*
- 3) Principles for the implant retained restorations*
- 4) Implant surgical guides*
- 5) Dental Implant indications and contraindications*
- 6) Laboratory procedures*
- 7) Treatment planning consideration with dental implants*
- 8) Things you wanted to ask your professor but were afraid to ask.*
- 9) Other tasty prosthodontic tidbits*
